

# changelog.md for @apiclient.xyz/abuse.ch

## 2025-11-22 - 2.0.1 - fix(package.json)

Pin pnpm packageManager in package.json and remove stale analysis.md

- Add packageManager field to package.json to pin pnpm to pnpm@10.18.1 with integrity hash
- Remove outdated analysis.md file

## 2025-11-22 - 2.0.0 - BREAKING CHANGE(UrlHaus)

Rename UrlHouse to UrlHaus (public API change), migrate dev dependencies to @git.zone, bump runtime deps, adjust TS module resolution, and update tests/docs.

- Renamed class/file: urlhouse.ts -> urlhaus.ts and updated export in ts/index.ts — public API class name changed from UrlHouse to UrlHaus (breaking change).
- Updated tests to use @git.zone/tstest/tapbundle, adjusted test names, and switched to `export default tap.start()` pattern.
- Migrated devDependencies from @gitzone/\* to @git.zone/\* and upgraded versions (@git.zone/tsbuild, tsbundle, tsdoc, tsrun, tstest).
- Bumped several runtime dependencies: @push.rocks/smartfile -> 11.2.7, @push.rocks/smartpath -> 6.0.0, csv-parser -> 3.2.0, https-proxy-agent -> 7.0.6, unzipper -> 0.12.3.
- Set TypeScript compiler option `module` to `nodenext` to match `moduleResolution: nodenext`.
- Minor CSV parsing/formatting fixes (mapValues trailing comma, consistent URL sanitization) and cleanup of temporary files after parsing.

- Expanded README and added readme.hints.md with migration/build/test instructions.

# 2023-07-28 - 1.0.1..1.0.8 - maintenance

Maintenance releases and internal core updates.

- Published patch releases 1.0.1 through 1.0.8.
- Contained internal core updates and version bumps; no user-facing feature changes documented.
- Consolidated minor fixes and housekeeping changes across these builds.

# 2023-08-01 - 1.0.9..1.0.12 - core fixes

Patch releases with core updates.

- Published patch releases 1.0.9 through 1.0.12.
- Applied multiple core updates (commit messages: "fix(core): update") and bumped versions.
- No additional feature work or breaking changes noted.
