

# changelog.md for @apiclient.xyz/bookstack

## 2026-03-28 - 1.1.1 - fix(account)

add retry and rate-limit backoff handling for API requests

- Enable retries and 429 backoff handling for JSON and text API requests.
- Add exponential backoff retries for binary downloads when rate limited.
- Introduce a small delay between paginated requests to reduce API throttling.

## 2026-03-28 - 1.1.0 - feat(build)

modernize the build configuration and add project documentation

- remove the web-specific tsbuild flag and update TypeScript build and test tooling dependencies
- export smartlog alongside smartrequest from the plugin module
- simplify tsconfig compiler options for Node typings and add a comprehensive README

## 2026-03-28 - 1.0.1 - fix(repo)

no changes to commit

## 2026-03-28 - 1.0.0 - project

Initial release.

- Project initialized with first commit.
