

changelog.md for @apiclient.xyz/gitlab

2026-03-02 - 2.5.0 - feat/gitlab)

add pipelines and jobs API support, including list/get/trigger/delete/retry/cancel operations, job controls, and related types and list options

- Add new pipeline methods: `getPipelines` (with filtering, ordering and pagination), `getPipeline`, `triggerPipeline`, `deletePipeline`, `retryPipeline`, `cancelPipeline`, `getPipelineVariables`, `getPipelineTestReport`
- Add new job methods: `getPipelineJobs` (with scope filtering and pagination), `getJob`, `retryJob`, `cancelJob`, `playJob`, `eraseJob`; preserve `getJobLog`
- Introduce `IPipelineListOptions` and `IJobListOptions` for richer listing filters
- Extend and add interfaces: `IGitLabPipeline` (additional metadata fields), `IGitLabJob` (expanded fields including pipeline, runner, artifacts), `IGitLabPipelineVariable`, `IGitLabTestReport`, `IGitLabTestSuite`, `IGitLabTestCase` and other minor interface reorganizations
- Export the new interfaces from the package entry (`ts/index.ts`)

2026-03-02 - 2.4.0 - feat/gitlab)

add repository branches and tags endpoints and corresponding types

- Add `getRepoBranches(projectId, opts?)` to list repository branches (supports pagination with page and perPage; defaults to page=1, perPage=50).
- Add `getRepoTags(projectId, opts?)` to list repository tags (supports pagination with page and perPage; defaults to page=1, perPage=50).
- Introduce `IGitLabBranch` and `IGitLabTag` interfaces and export them from `ts/index.ts`.

2026-02-28 - 2.3.0 - feat/gitlab)

add support for GitLab protected branches (list and unprotect)

- Added IGitLabProtectedBranch interface
- Added GitLabClient.getProtectedBranches(projectId) returning IGitLabProtectedBranch[]
- Added GitLabClient.unprotectBranch(projectId, branchName) to remove branch protection
- Exported IGitLabProtectedBranch from index.ts
- Non-breaking API additions; recommended minor version bump

2026-02-28 - 2.2.0 - feat(gitlabclient)

add deleteProject method to delete a project using GitLab API DELETE /api/v4/projects/:id

- Adds GitlabClient.deleteProject(projectId: number | string): Promise.
- Implements DELETE /api/v4/projects/:id and URL-encodes the projectId.
- Non-breaking API addition — bump minor version.

2026-02-28 - 2.1.0 - feat(gitlab)

add group- and project-management methods to GitLab client

- Adds getGroupByPath(fullPath) to fetch a group by full path
- Adds getGroupProjects(groupId, opts?) to list projects in a group (include_subgroups=true, default perPage=50, optional search)
- Adds getDescendantGroups(groupId, opts?) to list descendant subgroups (paginated, default perPage=50, optional search)
- Adds createGroup(name, path, parentId?) to create groups (defaults to private visibility)
- Adds createProject(name, opts?) to create projects with optional path, namespaceId, visibility (default private) and description

2026-02-24 - 2.0.3 - fix()

no changes detected; nothing to commit

- No files changed in the provided diff
- No updates to source, dependencies, or package files

2026-02-24 - 2.0.2 - fix()

no changes detected in diff; no version bump required

- No files changed in this commit/diff.
- No code or dependency changes detected; no release necessary.

2026-02-24 - 2.0.1 - fix()

no changes detected; no version bump required

- No files changed in diff
- package.json current version is 2.0.0

2026-02-24 - 2.0.0 - gitlab

Renamed package to @apiclient.xyz/gitlab and introduced a new ESM TypeScript GitLabClient API. Breaking release that replaces the legacy @mojoio/gitlab client.

- BREAKING CHANGE: package renamed to @apiclient.xyz/gitlab and API migrated to a new GitLabClient (v2.0.0).
- New modern ESM TypeScript client with support for projects, groups, CI/CD variables, and pipelines.
- fix(core): add npm release registry configuration (release tooling improvement).

2021-10-05 - 1.0.4..1.0.10 - core maintenance

Series of patch releases containing maintenance updates and small fixes across the 1.0.x line.

- Multiple "fix(core): update" commits applying minor fixes and internal updates across 1.0.4-1.0.10.
- Mostly patch-level changes and version bumps; no documented breaking or feature changes.

2017-06-10 - 1.0.1..1.0.3 - initial release & docs

Initial project setup and first releases.

- 1.0.1 — initial commit.
- 1.0.2 — add README.
- 1.0.3 — patch/versioned release.

Revision #4
