changelog.md for @foss.global/docs.foss.globa l

2025-02-16 - 1.2.1 - fix(core)

No changes detected in the current files.

2025-02-16 - 1.2.0 - feat(vitepress- config)

Add support for downloading and organizing additional documentation from external sources

- Integrated new functionality to download readmes for 'social.io' and organize them in the documentation structure.
- Updated navigation to include new links for 'social.io' docs.

2025-01-25 - 1.1.0 - feat(docs)

Add integration for downloading and incorporating readme documents from external domains

- Extended functionality in docs/.vitepress/config.ts to download and integrate README documents into documentation.
- Introduced new README files for several projects under the docs/push.rocks/ directory.
- Expanded project capabilities by integrating content from 'serve.zone' with update in README structures.

2025-01-25 - 1.0.10 - fix(docs)

Updated handlebars template documentation and fixed repository process filtering.

- Removed outdated smarthbs_readme and added updated documentation in smarthello_readme with enhanced usage instructions.
- Fixed process filtering in helpers.ts to skip 'smarthbs' repository.

2025-01-24 - 1.0.9 - fix(core)

Bump version to 1.0.9 to maintain compatibility

2024-04-30 to 2025-01-24 - 1.0.0 to 1.0.8 - Core Fixes

Series of core updates and fixes

- Multiple iterations of core fixes implemented across versions 1.0.0 to 1.0.8
