

changelog.md for @push.rocks/smartbrowser

2026-03-09 - 2.0.11 - fix(deps)

upgrade dependencies and adapt code, tests, and docs for new upstream versions

- Bump runtime deps: @push.rocks/smartydf -> ^4.2.0, @push.rocks/smartyppeteer -> ^2.0.5
- Bump devDependencies to modern majors: @git.zone/tsbuild ^4.3.0, @git.zone/tsrun ^2.0.1, @git.zone/tstest ^3.3.1, @push.rocks/tapbundle ^6.0.3, @types/node ^25.3.5
- Remove --allowimply from build script to match tsbuild v4 behavior
- Fix Puppeteer screenshot handling: convert returned Uint8Array to Buffer via Buffer.from()
- Update tests to match tapbundle v6 API (remove expectAsync) and export tap.start()
- Add/expand documentation (readme.md and readme.hints.md) with dependency notes and usage examples

2026-03-09 - 2.0.10 - fix(config(npmextra))

normalize npmextra.json keys to namespaced entries and add release registries

- Replaced top-level "npmci" and "gitzone" entries with namespaced keys (@git.zone/cli)
- Moved tsdoc/legal content under @git.zone/tsdoc
- Added a release configuration for @git.zone/cli with registries (verdaccio + npm) and accessLevel: public
- Added a new empty @ship.zone/szci entry

2026-03-09 - 2.0.9 - fix(smartydf)

lazily initialize SmartPdf, stop it only when present, and make evaluateOnPage reliably close pages

- Add private ensureSmartPdf() to lazily initialize and start SmartPdf only when PDF methods are called
- Call ensureSmartPdf() in pdfFromPage() before using smartpdf
- Stop SmartPdf in stop() only if it was initialized and clear the reference
- Wrap evaluateOnPage() page operations in try/finally and safely ignore errors from page.close() to avoid resource leaks or uncaught exceptions

2025-01-03 - 2.0.8 - fix(core)

Ensure consistent browser automation functionality

- Verified browser initialization and shutdown
- Tested PDF generation from web pages
- Validated screenshot capturing

2025-01-02 - 2.0.7 - fix(dependencies)

Update dependencies to latest versions.

- Updated @push.rocks/smartpdf dependency to version ^3.1.8
- Updated @push.rocks/smartunique dependency to version ^3.0.9
- Updated devDependencies to the latest versions

2024-05-29 - 2.0.6 - Project Maintenance

Minor project maintenance updates.

- Updated project description
- Revised tsconfig settings
- Made repeated updates to npxextra.json focusing on 'githost' configuration

2023-07-11 - 2.0.5 - Organizational Updates

Switch to new organizational scheme and internal updates.

- Transitioned project to new organizational scheme

2022-10-26 - 2.0.4 to 2.0.2 - Core Fixes

A series of core fixes were applied to ensure better stability and performance.

2022-03-24 - 2.0.1 to 2.0.0 - Core Improvements

Significant updates made to the core functionality.

- Updated core components to enhance performance and reliability

2021-11-07 - 1.0.22 to 1.0.21 - Core Fixes

Minor fixes to core components for improved stability.

2021-04-29 - 1.0.20 to 1.0.18 - Core Fixes

Routine updates and fixes for core stability.

2020-06-01 - 1.0.16 to 1.0.14 - Bug Fixes

Multiple bug fixes and enhancements to the core.

2019-06-04 - 1.0.13 to 1.0.11 - Bug Fixes

Addressed several core issues to improve functionality.

2019-05-29 - 1.0.10 to 1.0.6 - Core Updates

Numerous updates and fixes were applied to core functionalities.

2017-04-09 - 1.0.5 to 1.0.3 - Feature Enhancements

Introduced new features and enhancements.

- Added `.reload()` method
- Included `npmextra.json` for better configuration management

2016-09-20 - 1.0.1 to 1.0.0 - Initial Release and Improvements

Launched the project with several improvements and setup configurations.

- Initial project setup and configuration
- Enhanced README for better documentation
- Integrated GitLab CI for continuous integration

Revision #2
