

changelog.md for @push.rocks/smartdb

2026-03-26 - 2.0.0 - BREAKING CHANGE(core)

replace the TypeScript database engine with a Rust-backed embedded server and bridge

- adds a Rust workspace implementing wire protocol handling, commands, storage, indexing, aggregation, sessions, and transactions
- switches the TypeScript package to lifecycle orchestration via RustDbBridge and @push.rocks/smartrust
- removes previously exported TypeScript internals such as query, update, index, transaction, session, WAL, checksum, and router utilities
- updates build/test tooling and package metadata to compile and ship Rust binaries

2026-03-26 - 1.0.1 - fix(repo)

no changes to commit

2026-03-26 - 1.0.0 - project

Initial release
