

changelog.md for @push.rocks/smartdiff

2025-12-14 - 1.1.0 - feat(smartdiff)

Migrate package to ESM, replace fast-diff with `diff` and add rich diff APIs + formatters

- Set package to ESM (added "type": "module" to package.json)
- Replaced legacy fast-diff usage with the maintained `diff` package and exported it via plugins
- Added backward-compatible compact API: `createDiff(original, revision)` and `applyPatch(original, diff)`
- Introduced character/word/line/unified diff helpers (`getCharDiff`, `getWordDiff`, `getLineDiff`, `createUnifiedDiff`)
- Added console and HTML formatters (ANSI color output and HTML span/div output) and `getDefaultDiffCss` helper
- Expanded and modernized test suite (many new tests) and switched test tooling to `@git.zone/tstest`
- Updated devDependencies and author metadata, and updated `npmextra.json` release metadata and registries
- Removed legacy CI configuration (`.gitlab-ci.yml`) and cleaned up TypeScript config

2024-05-29 - 1.0.3 - maintenance

Consolidated maintenance, metadata and config updates.

- Update package description.
- Update TypeScript configuration (`tsconfig`).
- Update `npmextra.json` githost settings (applied across multiple commits).
- Switch to new organization scheme.
- Multiple duplicate/housekeeping commits across 2021-2024 were consolidated into this release.

2021-12-17 - 1.0.2 - fix(core)

Core fixes and small updates.

- fix(core): update — applied core fixes (details not present in commit message).
- Release/tag commits around 2021-12-16-2021-12-17 consolidated here.

2021-12-16 - 1.0.1 - fix(core)

Initial patch with core updates.

- fix(core): update — core update/fix included.

Revision #2
