2025-08-05 - 2.0.0 - BREAKING_CHANGE(api)

Major API cleanup and comprehensive documentation overhaul

BREAKING CHANGES

- **Removed deprecated methods:** `getChangeScoreForString()` and `getClosestMatchForString()` are no longer available
- **Use modern API instead:** `calculateScores()` and `findClosestMatch()` respectively
- **Improved type safety:** `findClosestMatch()` now correctly returns `string | null`

Features

- **Comprehensive documentation:** Complete readme overhaul with professional examples
- **New sections added:** Quick Start, Performance Guide, Error Handling, Troubleshooting, API Reference
- **Real-world examples:** Search-as-you-type, data deduplication, e-commerce search, recommendations
- **Browser compatibility info:** Environment requirements and bundle size details
- **Advanced configuration:** Fuse.js customization guidance

Improvements

- **Enhanced error handling:** Better graceful degradation patterns
- **Performance guidance:** Time complexity analysis and optimization tips
- **Modern developer experience:** Updated examples with current best practices
- **Type-safe APIs:** Consistent null handling across all methods

2025-05-13 - 1.1.10 - fix(documentation)

Update documentation and migration guide with standardized method names and deprecation notices.

- Replaced deprecated `getClosestMatchForString` with `findClosestMatch` in code examples.
- Replaced deprecated `getChangeScoreForString` with `calculateScores` in documentation.
- Updated readme plan to mark method naming standardization as completed.

2025-05-12 - 1.1.9 - fix(core)

Update build scripts, refine testing assertions, and enhance documentation

- Updated `.gitignore` to exclude local settings files
- Modified build script in `package.json` to use `'tsbuild tsfolders --allowimplicitany'`
- Revised `readme.plan.md` with comprehensive Fuse.js optimization and API improvement strategies
- Enhanced input validation, error handling, and JSDoc comments across core classes
- Standardized test syntax and improved test coverage for fuzzy matching features

2025-05-12 - 1.1.8 - fix(tests)

Standardize test syntax and update testing dependencies

- Added `@git.zone/tsrun` dependency to `package.json` for improved test runner support
- Refactored test export in `test/test.articlesearch.ts` to use default export instead of `tap.start()`
- Updated `readme.plan.md` to describe testing improvements and syntax standardization

2025-05-12 - 1.1.7 - fix(build)

Fix import paths, update CI workflows and upgrade dependencies for ESM compliance

- Updated import statements to include `.js` extensions for NodeNext compatibility
- Upgraded dependencies: `@push.rocks/smartpromise (^4.0.2)`, `@tsclass/tsclass (^9.2.0)`, `fuse.js (^7.1.0)`, `leven (^4.0.0)`, and `@push.rocks/tapbundle (^6.0.3)`
- Added new workflow files for CI (`default_tags.yaml` and `default_nottags.yaml`)

- Revised test files and documentation to reflect file path and dependency changes
- Minor adjustments in package.json (scripts and metadata) and tsconfig for enhanced module resolution

2024-05-29 - 1.1.6 - maintenance

This release brings a series of configuration and documentation updates as well as an organizational change.

- Updated project description.
 - Revised tsconfig settings.
 - Updated npmextra.json with new github details (merged from several commits).
 - Switched to a new organization scheme.
- (Note: A prior commit "1.1.6" from 2021 was a version bump and is omitted here.)

2021-10-04 - 1.1.5 - core

Core components were fixed in this update.

- fix(core): update

2021-10-03 - 1.1.4

This version was released as a version bump without additional significant changes.

2021-10-03 - 1.1.3 - core

Minor fixes were applied to core functionality.

- fix(core): update

2021-10-03 - 1.1.2 - core

Additional improvements and fixes to the core components.

- fix(core): update

2021-10-03 - 1.1.1 - core

A further core update fixing underlying issues.

- fix(core): update

2018-08-19 - 1.1.0 - Smartfuzzy

A fix was introduced for Smartfuzzy's matching functionality.

- fix(Smartfuzzy.getClosestMatchForString()) now returns the closest string directly):
update

2018-08-19 - 1.0.3 - ObjectSorter

A new feature has been added to sort objects by likability.

- feat(ObjectSorter): now sorts objects by likability

2018-08-19 - 1.0.2 - package

An adjustment was made to the package name in the npm configuration.

- fix(package): npm name

2018-08-19 - 1.0.1 - package

Initial package fixes were applied.

- fix(package): initial

Revision #2
