

changelog.md for @push.rocks/smartnginx

2025-11-27 - 2.0.54 - fix(package)

Pin package manager to pnpm@10.18.1 in package.json

- Added packageManager field to package.json to pin pnpm to 10.18.1 with integrity hash
- No runtime code changes; only package metadata updated

2025-11-27 - 2.0.53 - fix(core)

Refactor filesystem usage to smartfs async provider, update dependencies, tests and nginx config paths

- Replace @push.rocks/smartfile usage with @push.rocks/smartfs and introduce a shared SmartFs instance in plugins
- Convert sync file operations to async fs APIs (plugins.fs.file(...).write / plugins.fs.directory(...).create) in SmartNginx and NginxHost
- Adjust package.json: update test/build scripts, replace dependencies/devDependencies to new packages (@push.rocks/smartfs, @git.zone/*), and update versions
- Update test imports to new tapbundle path and node:path; export default tap.start() and remove unused Qenv instantiation
- Update internal path imports to 'node:path' and refactor smartnginx.plugins exports
- Change generated nginx certificate/config paths in configs from /mnt/HC_Volume_11396573/... to /mnt/data/... and regenerate default cert files
- Remove CI config (.gitlab-ci.yml) from repository

2024-05-29 - 2.0.52 - maintenance

Various metadata and TypeScript configuration updates; release 2.0.52.

- Update package description.
- Update tsconfig.
- Update npmextra.json (github) entries across multiple commits.
- Release tag for 2.0.52.

2023-07-26 - 2.0.51 - maintenance

Org migration and core fixes; release 2.0.51.

- Switch to new organization scheme.
- fix(core): miscellaneous updates.
- Release tag for 2.0.51.

2019-01-09..2019-08-20 - 2.0.19..2.0.50 - maintenance (multiple patch releases)

Series of incremental patch releases with small fixes and cleanups.

- Many patch releases across the 2.0.x line (2.0.19 through 2.0.50).
- Multiple "fix(core): update" commits addressing internal issues.
- CI and cleanup fixes (including 2.0.38 cleanup).
- Release tags for each patch.

2018-08-10 - 2.0.0 - breaking

Major release and scope / packaging changes.

- 2.0.0 release with core updates.
- BREAKING CHANGE: change scope to @pushrocks (package scope/name changed).
- Various CI and core fixes accompanying the major release.

2016-08-03..2016-07-25 - 1.0.6..1.0.0 - release / maintenance

1.x series consolidations, dependency updates and interface exports.

- Update dependencies and types.
- Consolidate naming and start exporting interfaces.
- Add license.
- Release tags for 1.0.0 through 1.0.6.

2016-07-06..2016-07-25 - 0.0.0..0.1.0 - initial development

Initial implementation and feature work establishing core functionality.

- Initial project setup, README and CI added.
- Implement nginx communication and child process handling.
- Start storing generated configs to filesystem and improve config handling.
- Add snippets support and tests; multiple README improvements.
- Early releases and version tags (0.0.0 through 0.1.0).

Revision #2
