

changelog.md for @push.rocks/smartscaf

2026-03-24 - 4.0.21 - fix(smartsconfig)

correct smartsconfig package key and add npmjs registry for public releases

- Rename the CLI configuration key from git.zone/cli to @git.zone/cli.
- Add <https://registry.npmjs.org> to the release registries alongside the existing Verdaccio registry.
- Register @ship.zone/szci in the project smart configuration.

2025-08-17 - 4.0.19 - fix(readme)

Update README with comprehensive quick start, usage examples, API reference and advanced guides

- Expanded README with a detailed Quick Start guide and installation instructions
- Added examples for creating templates, supplying variables, and scaffolding projects programmatically
- Documented core features: smart variable system, template composition, dynamic file naming, interactive CLI, and post-scaffold scripts
- Included advanced usage, CI/CD integration, template validation, and real-world example templates
- Improved formatting and added code snippets for API reference and ScafTemplate usage

2025-08-17 - 4.0.18 - fix(ScafTemplate)

Use interactive shell for post-scaffold scripts; update CI workflows and package metadata

- Switched ScafTemplate.runScripts to use smartshell.execInteractive so post-scaffold 'runafter' commands can run interactively
- Updated Gitea workflow environment: replaced CI image with code.foss.global/host.today/ht-docker-node:npmci and adjusted NPMCI_COMPUTED_REPOURL
- Changed CI install target from @shipzone/npmci to @ship.zone/npmci
- Updated package.json metadata (bugs URL and homepage now point to code.foss.global) and added a pnpm.overrides entry
- Minor TypeScript code cleanups and formatting (consistent trailing commas, safer string handling when parsing templates/frontmatter, improved concatenation when merging template files)
- tsconfig adjustments: enabled emitDecoratorMetadata and added baseUrl/paths entries
- Normalized README and template/test output files; updated .gitignore to ignore AI agent directories
- Updated changelog and commitinfo metadata

2025-08-17 - 4.0.17 - fix(ScafTemplate)

Use interactive shell for post-scaffold scripts; update test/build config and dependency versions

- Switched from smartshell.exec to smartshell.execInteractive when running smartscf 'runafter' commands to allow interactive commands during post-scaffold execution (ScafTemplate.runScripts).
- Updated package.json scripts: test now runs with additional flags (--verbose --logfile --timeout 60). Added typings entry pointing to dist_ts/index.d.ts.
- Bumped devDependencies: @git.zone/tsbuild -> ^2.6.4, @git.zone/tstest -> ^2.3.4, @push.rocks/tapbundle -> ^6.0.3.
- Updated runtime dependency versions: @push.rocks/lik -> ^6.2.2, @push.rocks/smartfile -> ^11.2.5, @push.rocks/smartshell -> ^3.3.0 (other deps kept or minor bumps).
- Added pnpm-workspace.yaml with onlyBuiltDependencies configuration (esbuild, mongodb-memory-server, puppeteer).

2025-04-15 - 4.0.16 - fix(dependencies)

Update dependency references and bump version numbers; adjust workflow and template commands

- Bump versions for devDependencies (@git.zone/tsbuild, @git.zone/tsrun, @git.zone/tstest, @push.rocks/tapbundle, and @types/node) and dependencies (@push.rocks/lik, @push.rocks/smartfile, @push.rocks/smartfm, @push.rocks/smarthbs, @push.rocks/smartinteract, @push.rocks/smartobject, @push.rocks/smartpromise, @push.rocks/smartshell, and @push.rocks/smartyaml)
- Replace smartparam with smartobject in both plugins and core modules
- Fix workflow install command by renaming '@gitzone/tsdoc' to '@git.zone/tsdoc'
- Update template runafter command from 'npm install' to 'echo "runafter"'

2024-05-29 - 4.0.15 - configuration updates

Updates to the project's configuration files, description and build settings.

- Updated description.
- Updated tsconfig (applied in multiple commits).
- Updated npmextra.json (github).

2023-08-18 - 4.0.14 - core

Improved core functionality.

- Fixed core update.

2023-07-25 - 4.0.13 - core & organization

Enhancements in core behavior and organizational structure.

- Fixed core update.
- Switched to new organization scheme.

2023-06-25 - 4.0.12 - core

Core improvements.

- Fixed core update.

2023-06-25 - 4.0.11 - core

Core improvements.

- Fixed core update.

2023-06-25 - 4.0.10 - core

Core improvements.

- Fixed core update.

2023-06-25 - 4.0.9 - core

Core improvements.

- Fixed core update.

2023-06-25 - 4.0.8 - core

Core improvements.

- Fixed core update.

2023-06-25 - 4.0.7 - core

Core improvements.

- Fixed core update.

2023-06-25 - 4.0.6 - core

Core improvements.

- Fixed core update.

2023-06-25 - 4.0.5 - core

Core improvements.

- Fixed core update.

2023-06-24 - 4.0.4 - core

Core improvements.

- Fixed core update.

2023-06-24 - 4.0.3 - core

Core improvements.

- Fixed core update.

2022-06-25 - 4.0.2 - core

Core improvements.

- Fixed core update.

2022-06-25 - 4.0.1 - core

Core improvements.

- Fixed core update.

2022-06-25 - 4.0.0 - core

Core improvements.

- Fixed core update.

2022-06-25 - 3.0.10 - core (breaking)

A breaking change was introduced affecting the module format.

- BREAKING CHANGE (core): switched to ESM.

2020-01-31 - 3.0.9 - core

Routine core update.

- Fixed core update.

2019-10-11 - 3.0.8 - core

Routine core update.

- Fixed core update.

2019-10-02 - 3.0.7 - core

Routine core update.

- Fixed core update.

2019-09-10 - 3.0.6 - core

Routine core update.

- Fixed core update.

2019-09-10 - 3.0.5 - core

Routine core update.

- Fixed core update.

2019-09-10 - 3.0.4 - core

Routine core update.

- Fixed core update.

2019-09-10 - 3.0.3 - general updates

Updates to project dependencies and general code improvements.

- Performed update.
- Updated dependencies.

2019-02-17 - 3.0.2 - core

Routine core update.

- Fixed core update.

2019-01-27 - 3.0.1 - core

Routine core update.

- Fixed core update.

2018-10-04 - 3.0.0 - core

Changes from merging and core improvements.

- Fixed core update.
- Merged master branch changes and performed additional updates.

2018-08-30 - 2.0.2 - structure (breaking)

A breaking change in the project's structure.

- BREAKING CHANGE (structure): templates now take their path within the constructor.

2018-08-27 - 2.0.1 - minor

Versions in this range involved only version bump commits with no significant changes.

- No significant changes.

2017-08-09 - 1.0.14 - scope (breaking)

A breaking change in the package scope was applied.

- BREAKING CHANGE (scope): switched to new @pushrocks scope.

2017-08-09 - 1.0.13 - core

Improvements to variable handling.

- Fixed variable distribution.

2017-07-28 - 1.0.12 - dependencies

Dependency updates.

- Updated dependencies.

2017-06-01 - 1.0.11 - dependencies

Dependency updates.

- Updated dependencies.

2017-06-01 - 1.0.10 - CLI improvements

Enhanced CLI error prevention.

- Prevented error due to empty defaults.yml.

2017-05-27 - 1.0.9 - dependencies

Dependency updates.

- Updated dependencies.

2017-05-27 - 1.0.8 - templating

Improved file templating support.

- Added support for frontmatter for advanced file templating.

2017-05-27 - 1.0.7 - documentation

Documentation improvements.

- Added docs.

2017-05-27 - 1.0.6 - fixes

Minor fixes.

- Fixed deep add.

2017-05-26 - 1.0.5 - smartfile updates

Smartfile updates.

- Updated smartfile.

2017-05-26 - 1.0.4 - tests

Test fixes.

- Fixed tests.

2017-05-26 - 1.0.3 - smartfile updates

Smartfile updates.

- Updated smartfile.

2017-05-25 - 1.0.2 - functionality

Minor functionality improvements.

- Ensured proper functionality.

2017-05-25 - 1.0.1 - core

Core fixes.

- Fixed working issues.

2017-05-06 - 1.0.0 - initial release and CLI integration

The initial release introducing CLI support and project setup.

- Added CLI to prompt for missing variables.
- Started CLI integration.
- Added readme and CI tslint configuration.
- Performed initial setup and various update tasks.

Revision #2
