

changelog.md for @push.rocks/smartsystem

2026-02-13 - 3.0.8 - fix(deps)

bump dependencies, adjust build script and npmextra publish config, and refresh documentation

- Bumped runtime deps: @push.rocks/lik ^6.0.0 -> ^6.2.2, @push.rocks/smartenv ^5.0.2 -> ^6.0.0, @push.rocks/smarnetwork ^3.0.0 -> ^4.4.0, @push.rocks/smartpromise ^4.0.2 -> ^4.2.3, systeminformation ^5.12.1 -> ^5.30.7
- Updated devDependencies: @git.zone/tsbuild ^2.1.63 -> ^4.1.2, @git.zone/tsrun ^1.3.3 -> ^2.0.1, @git.zone/tstest ^1.0.72 -> ^3.1.8; removed tslint and tslint-config-prettier
- Changed build script to remove --allowimplicitany ("build": "(tsbuild tsfolders)")
- Updated npmextra.json: migrated keys to scoped entries (@git.zone/cli, @git.zone/tsdoc, @ship.zone/szci), added release registries (verdaccio + npm) and accessLevel
- Documentation updates: expanded readme.md with examples, runtime detection, network and system usage, legal/licensing clarifications; added readme.hints.md

2025-08-29 - 3.0.7 - fix(build)

Switch build script to run tsbuild on tsfolders instead of using the --web flag

- Updated package.json scripts.build from "(tsbuild --web --allowimplicitany)" to "(tsbuild tsfolders --allowimplicitany)"
- This is a build-script change only; no source API changes were made

2025-08-29 - 3.0.6 - fix(smartsystem)

Add typings entry and normalize package description; sync commitinfo

- Add "typings": "dist_ts/index.d.ts" to package.json to expose TypeScript declaration file.
- Normalize package description wording (replace contraction "it's" with "it is") for consistency and clarity.
- Update ts/00_commitinfo_data.ts description to match the package.json description.

2025-08-29 - 3.0.5 - fix(metadata)

Clarify package/module description by expanding contraction

- Replaced "it's" with "it is" in the package/module description to improve clarity (files updated: npmextra.json, ts/00_commitinfo_data.ts).
- Documentation/metadata-only change; no runtime or API changes.
- Bump patch version to 3.0.5.

2025-08-29 - 3.0.4 - fix(smartsystem)

Bump version to 3.0.4

- Patch release: increment package version to 3.0.4
- No functional code changes detected in source files
- Tests are present but contain placeholder implementations
- Dependencies are pinned as wildcard '*' and were not updated

2025-08-29 - 3.0.3 - fix(readme)

Update README: expand documentation, add installation, usage examples, API overview, and advanced guides

- Completely revamped README with a clearer project description and features list
- Added Installation section with npm / pnpm / yarn examples
- Added Quick Start, API overview, and multiple usage examples (env, CPU, network, systeminformation)
- Added Real-World Use Cases (health check, network monitoring, resource scaling) and Advanced Features (cross-platform, Docker detection)
- Clarified TypeScript support and added links to full API documentation
- Documentation-only changes; no code or API behaviour modified

2025-08-29 - 3.0.2 - fix(smartsystem)

Normalize package scopes, update dev dependencies and tooling, add pnpm workspace and packageManager, remove GitLab CI, and update imports/docs/tests

- Normalize package scope names from @pushrocks/* to @push.rocks/* across source, commit info and README
- Update dependency versions: bump @push.rocks/smartpromise to ^4.0.2 and ensure other @push.rocks packages use caret ranges
- Switch dev tooling namespaces to @git.zone (tsbuild/tsrun/tstest) and add @git.zone/tsrun
- Enhance npm scripts: make test run with verbose, logfile and increased timeout
- Add packageManager field (pnpm@10.14.0+sha512...) to package.json and add pnpm-workspace.yaml with onlyBuiltDependencies: [esbuild]
- Remove legacy .gitlab-ci.yml CI configuration
- Update imports in ts and test files to match new package namespaces

2024-05-29 - 3.0.1 - chore

Update of package metadata and TypeScript configuration.

- update description
- update tsconfig (adjustments to TypeScript config)
- update npmextra.json: githost (fixes to githost entries)

2022-07-28 - 3.0.0 - fix(core)

Minor core fixes and release of 3.0.0.

- fix(core): update

2022-07-28 - 2.0.10 - BREAKING (core)

Breaking change: module format switched to ESM.

- BREAKING CHANGE(core): switch to esm
- misc maintenance and fixes leading up to this release

2017-07-31 - 2.0.1..2.0.9 - maintenance

Series of patch releases with small fixes and upkeep across the 2.0.x line.

- Multiple patch releases (2.0.1 → 2.0.9) containing repeated core fixes
- Updates to README and repository metadata
- update yarn lock (notably in 2.0.1)

2017-07-31 - 1.0.0..1.0.18 - initial development & improvements

Initial development, feature additions and documentation improvements across 1.0.x.

- initial releases and basic module structure; first working version
- add npm as default module loader (1.0.6)
- improve path resolution and add keywords (1.0.4-1.0.5)
- add docs, improve README and tests across multiple 1.0.x releases
- CI updates and general streamlining of the project

Revision #2
