

# changelog.md for @push.rocks/smarttime

## 2026-02-15 - 4.2.3 - fix(test,docs)

increase tstest verbosity, enable logfile, and extend timeout; fix README formatting for company line

- package.json: test script updated to add --verbose, --logfile, and --timeout 120 to tstest invocation
- readme.md: adjusted company line formatting (removed list marker and added trailing spaces) to ensure proper Markdown line break/paragraph

## 2026-02-15 - 4.2.2 - fix(npmextra)

restructure npmextra.json: flatten @git.zone/cli and tsdoc to top-level, add Verdaccio registry and @ship.zone/szci entry, remove deprecated npmci and gitzone keys

- Promoted @git.zone/cli to top-level and removed the legacy npmci/gitzone wrappers
- Moved tsdoc/legal content into a new @git.zone/tsdoc top-level entry
- Added <https://verdaccio.lossless.digital> to release.registries alongside registry.npmjs.org
- Added @ship.zone/szci entry with npmGlobalTools: []
- Only configuration/metadata changes — no source code modifications

## 2026-02-15 - 4.2.1 - fix(cronmanager)

improve cron scheduling and lifecycle handling; add wake/wakeCycle to promptly recalculate scheduling when jobs are added/removed/started/stopped, fix timeout handling, and update tests and deps

- CronManager: add wakeCycle (Deferred) to wake the sleeping cycle immediately when jobs change
- CronManager: refactor runCronCycle to compute the soonest next execution (soonestMs), await timeout or wake signal, handle overdue jobs without waiting, and cancel timeouts to avoid lingering timers
- CronJob: guard checkExecution to return when job status is 'stopped' to prevent unnecessary scheduling work
- Stop logic: safely cancel executionTimeout only if present and ensure the cycle is woken when stopping
- Tests: switch test imports to @git.zone/tstest/tapbundle
- Dependencies: bump several devDependencies and dependencies (tsbuild, tsbundle, tstest, croner, smartpromise, dayjs, pretty-ms, etc.)
- Docs/config: expand README with examples and security/reporting info; add @git.zone/cli release config to npmextra.json

## 2024-12-14 - 4.2.0 - feat(ondemand)

Add on-demand timestamp feature

- Added an on-demand script to output human-readable time ago for current timestamp.

## 2024-12-13 - 4.1.1 - fix(smarttime.units)

Fix issue in getMillisecondsAsHumanReadableAgoTime

- Corrected the parameter type passed to date-fns.formatDistanceToNow within getMillisecondsAsHumanReadableAgoTime function.

## 2024-12-13 - 4.1.0 - feat(smarttime.units)

Add function to get human-readable time ago string from milliseconds.

- Introduced `getMillisecondsAsHumanReadableAgoTime` to convert a timestamp to a human-readable text indicating time ago.

## 2024-12-13 - 4.0.9 - fix(dependencies)

Updated dependencies in package.json and resolved cron function issues.

- Updated multiple dependencies in package.json to their latest versions.
- Fixed issue in cron job instantiation by correcting the import and initialization of the `croner.Cron` class.

## 2024-06-23 - 4.0.8 - fix(documentation)

Corrected formatting issues in changelog.md

- Fixed markdown formatting by removing unnecessary newlines.

## 2024-06-23 - 4.0.7 - fix(build)

Remove GitLab CI configuration and update dependencies in package.json

- Removed `.gitlab-ci.yml` from the project
- Updated `@git.zone/tsbuild` from `^2.1.72` to `^2.1.80`
- Updated `@git.zone/tstest` from `^1.0.86` to `^1.0.90`
- Updated `@push.rocks/tapbundle` from `^5.0.15` to `^5.0.23`
- Updated `@types/node` from `^20.11.19` to `^20.14.8`
- Updated `@push.rocks/lik` from `^6.0.12` to `^6.0.15`
- Updated `dayjs` from `^1.11.10` to `^1.11.11`
- Fixed test files to export default `tap.start()`

# 2024-05-29 - 4.0.6 - Maintenance Updates

Updates to configuration files and metadata.

- Updated description in the project documentation.
- Revised tsconfig settings.
- Changes to npmextra.json regarding githost configuration.

# 2023-10-20 - 4.0.5 to 4.0.6 - Maintenance Fixes

Routine fixes and updates.

- fix(core): update

# 2023-08-13 - 4.0.4 to 4.0.5 - Maintenance Fixes

Routine fixes and updates.

- fix(core): update

# 2023-07-21 - 4.0.2 to 4.0.4 - Maintenance Fixes

Routine fixes and updates.

- fix(core): update

# 2023-01-06 - 4.0.0 to 4.0.1 - Core Changes

Routine fixes and core updates.

- fix(core): update

# 2022-11-21 - 3.0.45 to 4.0.0 - Major Release

Significant changes and breaking updates.

- BREAKING CHANGE(core): switch to esm

# 2021-11-08 - 3.0.41 to 3.0.42 - Timestamp Update

Updates and bug fixes for the timestamp feature.

- fix(timestamp): add missing `.isOlderThanOtherTimeStamp()` to `TimeStamp` class
- fix(readme): fix readme
- fix(update croner): update croner package, closes #1. Thank you @Hexagon4

# 2020-09-04 - 3.0.28 to 3.0.31 - Maintenance Fixes

Routine fixes and updates.

- fix(core): update

# 2020-07-11 - 3.0.19 to 3.0.20 - Maintenance Fixes

Routine fixes and updates.

- fix(core): update

# 2020-05-25 - 3.0.12 to 3.0.16 - Maintenance Fixes

Routine fixes and updates.

- fix(core): update

# 2019-06-18 - 3.0.8 to 3.0.12 - Maintenance Fixes

Routine fixes and updates.

- fix(core): update

# 2018-10-21 - 3.0.0 to 3.0.1 - Date Handling

Updates to date and time support.

- fix(date): now supports date and time
- fix(ExtendedDate): now respects single digit dates

# 2018-10-17 - 2.0.2 to 3.0.0 - Major Release

Breaking changes and dependency updates.

- BREAKING CHANGE(deps): remove moment and use luxon

# 2018-06-10 - 2.0.0 to 2.0.1 - Core Changes

Updated and changed the scope of core functionalities.

- fix(core): update and change scope

# 2017-08-16 - 1.0.0 to 1.0.3 - Initial Implementation

Inception of project with core functionalities.

- first implementation

---

Revision #2
