

changelog.md for @serve.zone/npmcdn

2026-01-10 - 1.0.4 - fix(ui)

serve SPA bundle from root, add cache-busting query, expose files API and include default CSS manager styles

- Changed HTML script src to use absolute path /bundle.js so the SPA loads correctly when served from various routes.
- Added cache-busting by appending `?v=${project.version}` to /bundle.js in served index.html to avoid stale client bundles.
- Made the `/api/files/:org/:package` endpoint available (removed dev-only gating) so package file listing is accessible in non-dev modes, with permission check retained.
- Added `cssManager.defaultStyles` to the `opencdn-mainpage` element to ensure default design system styles are included.

2026-01-04 - 1.0.3 - maintenance

Consolidated maintenance updates.

- Minor maintenance and housekeeping ("update" commits).
- Duplicate update commits merged; no further detail provided in commit messages.
- No explicit functional changes described.

2022-01-06 - 1.0.1–1.0.3 - core fixes & release tags

Summary of early releases: core fixes and several non-descriptive release/tag commits.

- `fix(core): update` — core fixes applied (appears in 1.0.1 and 1.0.2).
- Non-descriptive release/tag commits for 1.0.2 and 1.0.3 (messages: "1.0.2", "1.0.3")—no details provided.

- These commits appear to be small fixes and housekeeping around the initial 1.0.x releases.

2022-01-05 - unknown - initial

Initial project commit.

- Project initialized ("Initial commit").

Revision #2
