

changelog.md for @signature.digital/tools

2025-12-18 - 1.3.0 - feat(interfaces)

add comprehensive TypeScript interface modules, demo data, docs, and publish metadata

- Introduce many new interface modules under `ts_interfaces` (contract, attachments, identity, versioning, legal, lifecycle, pdf, signature, terms, collaboration) with types and factory functions
- Add demo data package (`ts_demodata`) including a detailed demo contract and updated demodata readme
- Add/expand package readmes and `ts/readme` for `@signature.digital/tools`, `@signature.digital/interfaces` and `@signature.digital/demodata`
- Update `tspublish.json` files to declare package dependencies for monorepo publishing
- Enable `experimentalDecorators` in `tsconfig.json`
- Add MIT license file

2025-12-18 - 1.2.0 - feat(tools)

add demodata feature, update package metadata, `tsconfig` paths, CI/workflows, and bump deps

- Add demodata subpackage (`@signature.digital/demodata`) and export entry
- Introduce `tsconfig` path aliases for `@signature.digital/tools`, `@signature.digital/demodata`, and `@signature.digital/interfaces`
- Update `package.json` metadata (repository, bugs, homepage), add `pnpm` overrides, and bump `dev/deps` (`@git.zone/tsbuild`, `@git.zone/tstest`, `@tsclass/tsclass`)
- Rename and configure `tspublish.json` files to include package names and registries for publishing
- Fix interfaces: change `InvolvedParty.contact` type to `plugins.tsclass.business.TContact`
- Update tests to use `@git.zone/tstest/tapbundle` and export `tap.start()`

- Revise CI workflow files to use code.foss.global image, new secret placeholder formatting, and @ship.zone/npmci package name
- Rework npmextra.json structure and add release registries and szci config
- Update README and changelog content and add minor .gitignore entries for AI tools

2024-12-19 - 1.1.0 - feat(demodata)
