

# changelog.md for @tsclass/tsclass

## 2026-03-14 - 9.4.0 - feat(storage)

add generic storage descriptor type and re-export it from descriptors

- introduces IStorageDescriptor with optional storage type support for s3 and smartstorage
- keeps IS3Descriptor as a deprecated alias for backward compatibility
- re-exports storage descriptor types from the descriptors module
- updates tooling dependencies and migrates tests to the new tstest tapbundle import

## 2025-09-23 - 9.3.0 - feat(finance)

Add IStockPrice type and export; update README and add project tooling configs

- Introduce IStockPrice interface in ts/finance/stockprice.ts (ticker, price, currency, change, changePercent, previousClose, timestamp, provider, marketState, optional exchange and exchangeName).
- Export IStockPrice from ts/finance/index.ts so it becomes part of the public finance API.
- Update README to reference concrete file paths for types and add a Stock Price usage example.
- Add project tooling configuration files: .serena/project.yml, .serena/.gitignore and .claude/settings.local.json.

## 2025-05-05 - 9.2.0 - feat(descriptors)

Add new descriptors module with Cloudflare and LetterExpress interfaces and documentation

- Introduced new descriptors interfaces (ICloudflareDescriptor and ILetterExpressDescriptor) in ts/descriptors/index.ts
- Added descriptors readme to document their purpose
- Integrated descriptors into the main module export in ts/index.ts

## 2025-04-29 - 9.1.0 - feat(network)

Add DNS convenience interface to support ACME DNS-01 challenge management in the network module.

- Added IConvenientDnsProvider interface in ts/network/dnsconvenience.ts
- Updated ts/network/index.ts to export the DNS convenience interface

## 2025-04-16 - 9.0.0 - BREAKING CHANGE(finance)

refactor: migrate invoice APIs to unified accounting document types

- Introduced new accounting document types in ts/finance/accountingdoc.ts to standardize invoice, credit note, debit note, and self-billed invoice representations
- Updated ts/finance/index.ts to export the new accounting document module
- Removed the legacy ts/finance/invoice.ts module

## 2025-04-12 - 8.2.1 - fix(business/job)

Refactor job interface to support expanded employment details and improve type safety

- Changed exported IJob from a class to an interface
- Removed obsolete properties (monthlyTotal, currency)
- Added new types for contract, work location, experience level, and job status
- Introduced detailed fields: url, location, postedDate, salary, contractType, skillTags, qualificationTags, languages, and history

# 2025-04-04 - 8.2.0 - feat(finance/payment)

Add optional 'description' field to payment option info.

- Enhanced the IPaymentOptionInfo interface in ts/finance/payment.ts by adding an optional 'description' property for improved context.

# 2025-03-26 - 8.1.1 - fix(business/letter)

Remove extraneous inline comment from TLetter type union in business/letter.ts

- Clean up redundant comment to improve code clarity
- Maintain consistency in type definitions

# 2025-03-26 - 8.1.0 - feat(business/letter)

Extend TLetter to include invoice support and update dependency versions

- Bump type-fest to ^4.38.0 and @types/node to ^22.13.13 in package.json
- Modify TLetter type in ts/business/letter.ts to support finance.TInvoice alongside simple letters

# 2025-03-25 - 8.0.4 - fix(license/business-letter)

Remove legacy commented-out code from letter module and update copyright header

- Removed unused commented block in ts/business/letter.ts
- Updated copyright header in license file

## 2025-03-24 - 8.0.3 - fix(ci)

Add Gitea workflow files for CI/CD, update repository URLs, and standardize formatting

- Added .gitea/workflows/default\_nottags.yaml and default\_tags.yaml to manage CI for tagged and non-tagged pushes
- Updated package.json repository, homepage, and bugs URLs to reflect the new code.foss.global location
- Modified .gitignore custom section comment for clarity
- Standardized code formatting and string quoting across various source files
- Enhanced tsconfig.json by adding baseUrl and paths settings

## 2025-03-24 - 8.0.2 - fix(commitinfo)

Refresh autogenerated commit info and internal metadata for version consistency

- No functional changes were made
- Updated internal commit metadata to reflect the current project state

## 2025-03-24 - 8.0.1 - fix(documentation)

Improve documentation clarity and update package metadata

- Correct author field in package.json to 'Task Venture Capital GmbH'
- Enhance readme.md with comprehensive usage examples and detailed type structure for better guidance

# 2025-03-24 - 8.0.0 - BREAKING CHANGE(tsclass)

Trigger patch release with no code changes

# 2025-03-20 - 7.1.1 - fix(finance)

Add optional date property to the Invoice interface

- Introduced an optional 'date' field with explanatory comments to capture the invoice date if not provided from the encompassing letter

# 2025-03-20 - 7.1.0 - feat(ts/finance/invoice)

Add electronicAddress field to Invoice for circular xinvoice support

- Introduce optional electronicAddress property with scheme and value
- Enhance documentation for buyer reference in invoice interface

# 2025-03-20 - 7.0.0 - BREAKING CHANGE(business/address)

Remove eAddress property from IAddress interface

- Removed eAddress field that allowed storage of electronic contact means (phone, email, peppolId)

# 2025-03-20 - 6.1.2 - fix(business/address)

Improve documentation comments for address interface properties

- Added detailed comments for the 'coordinates' property to explain its usage
- Added detailed comments for the 'eAddress' property to describe the storage of electronic contact information

# 2025-03-20 - 6.1.1 - fix(finance)

Add clarifying comment for the buyerReference field in the invoice interface

- Document buyerReference as an optional field to help buyers identify the invoice

# 2025-03-20 - 6.1.0 - feat(business/address)

Add optional countryCode and coordinates properties to IAddress interface

- Extend address interface with an optional countryCode property
- Add optional coordinates object with lat and lng for geographic metadata

# 2025-03-19 - 6.0.1 - fix(business)

Remove exports for 'company' and 'person' modules from the business index

- Removed export statement for './company.js' in ts/business/index.ts
- Removed export statement for './person.js' in ts/business/index.ts

# 2025-03-19 - 6.0.0 - BREAKING CHANGE(TContact)

Reaffirm project metadata and documentation consistency

- Verified commitinfo data, package.json, and README content for correctness
- No functional code changes were introduced

# 2025-03-11 - 5.0.0 - BREAKING CHANGE(network)

Update reverse proxy configuration to support multiple destination IPs and ports

- Replaced 'destinationIp' and 'destinationPort' with 'destinationIps' (array) and 'destinationPorts' (array) to enable multiple destinations

# 2025-03-10 - 4.4.4 - fix(business)

Fixes typo in ILetter interface

- Removed unused property 'letterData' from ILetter content structure.

# 2025-03-07 - 4.4.3 - fix(network)

Fix destinationPort type for IReverseProxyConfig

- Corrected the type of destinationPort in IReverseProxyConfig from 'string' to 'number'.

# 2025-03-07 - 4.4.2 - fix(dependencies)

Updated package dependencies for improved stability and performance.

- Updated 'type-fest' dependency to version ^4.37.0.
- Updated '@git.zone/tsbuild' to version ^2.2.6.
- Updated '@git.zone/tstest' to version ^1.0.96.
- Updated '@push.rocks/tapbundle' to ^5.5.6.
- Updated '@types/node' to ^22.13.9.

## 2025-03-07 - 4.4.1 - fix(business)

Fix missing letterData property in ILetter interface.

- Added missing letterData property to the content structure of the ILetter interface.
- Ensured consistency and completeness of ILetter interface for proper data handling of letter components.

## 2025-01-11 - 4.4.0 - feat(website)

Add ILinkBlock interface for managing groups of links

- Introduced a new interface ILinkBlock in ts/website/linkblock.ts for managing grouped links.
- Exported ILinkBlock from ts/website/index.ts to make it available for external usage.

## 2025-01-10 - 4.3.0 - feat(website)

Added new ILink interface to the website module.

- Introduced ILink interface with properties like url, text, description, icon, and target.
- Updated ts/website/index.ts to export the new link interface.

## 2024-12-11 - 4.2.0 - feat(dependencies)

Update dependencies and enhance code documentation

- Updated 'type-fest' dependency from ^4.20.1 to ^4.30.0 for improved type definitions.
- Updated development dependencies for better development experience.
- Enhanced code documentation for the ICommitInfo interface with detailed JSDoc comments.

## 2024-07-26 - 4.1.2 - fix(finance)

Updated Invoice interface to support various currencies.

- Changed the 'currency' field in the Invoice interface from fixed 'EUR' to type TCurrency.

## 2024-07-26 - 4.1.1 - fix(finance)

Fix Invoice interface to correctly include the currency field

- Corrected the Invoice interface definition in `ts/finance/invoice.ts`
- Moved `position` field to the top of the InvoiceItem interface

## 2024-07-26 - 4.1.0 - feat(finance)

Added notes field to Invoice interface

- Expanded Invoice interface to include notes field allowing additional notes for invoices.

## 2024-07-24 - 4.0.65 - fix(finance)

Added 'type' property to Invoice interface

- Added 'type' property to the Invoice interface in the finance domain.
- This property indicates whether the invoice is a 'creditnote' or 'debitnote'.

## 2024-07-18 - 4.0.64 - fix(business)

Add relationship field to contact interface

- Added 'relationship' field to the IContact interface in ts/business/contact.ts

## 2024-06-28 - 4.0.63 - fix(saas)

Refactor IProduct to separate IProductFeature interface

- Updated @types/node from 20.14.8 to 20.14.9
- Refactored IProduct's features property to a standalone IProductFeature interface in saas/product.ts

## 2024-06-24 - 4.0.62 - fix(dependencies)

Updated dependencies to latest versions

- Updated 'dependencies > type-fest' to version ^4.20.1
- Updated 'devDependencies > @git.zone/tsbuild' to version ^2.1.82
- Updated 'devDependencies > @git.zone/tsrun' to version ^1.2.49
- Updated 'devDependencies > @git.zone/tstest' to version ^1.0.90
- Updated 'devDependencies > @push.rocks/tapbundle' to version ^5.0.23
- Updated 'devDependencies > @types/node' to version ^20.14.8

## 2024-06-24 - 4.0.61 - fix(dependencies)

Update dependencies to latest versions

- Updated 'dependencies > type-fest' to version ^4.20.1
- Updated 'devDependencies > @git.zone/tsbuild' to version ^2.1.82
- Updated 'devDependencies > @git.zone/tsrun' to version ^1.2.49
- Updated 'devDependencies > @git.zone/tstest' to version ^1.0.90
- Updated 'devDependencies > @push.rocks/tapbundle' to version ^5.0.23
- Updated 'devDependencies > @types/node' to version ^20.14.8

# 2024-06-19 - 4.0.59 - core

Fixes and updates to core functionalities.

- Multiple updates and fixes applied to the core codebase

# 2024-06-17 - 4.0.59 to 4.0.56 - core

Routine updates and fixes to the core.

- Multiple core updates and fixes

# 2024-06-08 - 4.0.54 - core

Core fixes applied.

- Various fixes in the core functionality

# 2024-04-17 - 4.0.53 - core

Core functionality updated with fixes.

- Updates and fixes to core features

# 2024-04-16 - 4.0.52 - documentation

Documentation update.

- Documentation improved and updated

# 2024-02-17 - 4.0.51 - core

Fixes for core applied.

- Multiple core fixes implemented

# 2024-02-10 - 4.0.48 - core

Routine core updates and fixes.

- Several updates and fixes for core functionality

# 2023-10-15 - 4.0.46 - core

Core updates.

- Core functionalities updated and fixes applied

# 2023-10-13 - 4.0.44 - core

Routine fixes for core functionalities.

- Various updates to core functionalities

# 2023-09-13 - 4.0.43 - core

Core updates and fixes.

- Several core updates and fixes

# 2023-05-08 - 4.0.41 - core

Core updates.

- Core functionalities updated

## 2023-05-06 - 4.0.39 - core

Core updates and fixes.

- Multiple core updates and fixes

## 2023-04-19 - 4.0.37 - core

Routine core updates.

- Core fixes and updates applied

## 2023-04-05 - 4.0.35 - core

Core functionalities updated.

- Core functionalities updated and fixes applied

## 2023-03-14 - 4.0.33 - core

Routine core fixes and updates.

- Core functionalities updated

## 2023-03-09 - 4.0.32 - core

Routine maintenance for core.

- Core updates and fixes

## 2023-02-15 - 4.0.31 - core

Core updates applied.

- Fixes and updates to core functionalities

## 2023-02-06 - 4.0.30 - core

Routine fixes.

- Multiple core updates and fixes

## 2023-01-12 - 4.0.29 - core

Core updates applied.

- Fixes and updates to core functionalities

## 2022-11-20 - 4.0.27 - core

Routine core fixes.

- Core functionalities updated and fixed

## 2022-10-31 - 4.0.26 - core

Routine maintenance and fixes.

- Core functionalities updated

## 2022-10-24 - 4.0.24 - business.IContract

Added business logic for contracts.

- Added IContract logic to business module

## 2022-09-14 - 4.0.21 - core

Routine core updates and fixes.

- Core functionalities updated and fixed

## 2022-08-17 - 4.0.18 - core

Routine maintenance for core.

- Core functionalities updated and fixes applied

## 2022-06-16 - 4.0.17 - core

Routine fixes.

- Core functionalities updated

## 2022-04-28 - 4.0.0 - core

Major update with significant core changes.

- Switch to ESM format
- Multiple core functionalities updated and fixed
